EDUCATION

Fontys University of Applied Sciences – Eindhoven, Netherlands

Bachelor of Science in Software Engineering 2022-2026

Relevant Coursework: Distributed Systems, Cloud Computing (AWS, Azure), Enterprise Architecture, Docker, Kubernetes, REST APIs, Microservices, Cyber Security Concepts, Object-Oriented Programming, System Design, DevOps, Version Control (Git), Software Testing and Quality

- University Ambassador Abroad

Victoria University – Melbourne, Australia

Exchange Semester in IT Management 2025

Relevant Coursework: Leadership, Personal and Professional Branding, Communication Development, Project Management

Sofia High School of Mathematics – Sofia, Bulgaria

Diploma in Mathematics and Information Technologies 2017-2022

Relevant Coursework: Mathematics, IT Systems, Programming

- High-School Representative and Speaker
- Captain of the Volleyball Team

EXPERIENCE

Fraunhofer Institute for Industrial Engineering IAO – Stuttgart, Germany

Scientific Assistant – Applied AI Research (Intern) 2026

- Conducted applied AI research on Optical Character Recognition (OCR) for industrial document processing.
- Designed and implemented a reproducible benchmarking framework for evaluating state-of-the-art OCR models.
- Developed hybrid OCR pipelines combining multiple AI models through confidence-based orchestration and automated evaluation.
- Improved document extraction accuracy through preprocessing, post-processing, and performance optimization techniques.
- Evaluated OCR systems using various metrics on real-world insurance invoices.
- Collaborated with researchers and industrial partners to develop AI-driven document automation solutions.
- Research resulted in the technical publication "**A Reproducible OCR Benchmarking System for Scanned Car Repair Invoices**" (see *Publications*).

Coca-Cola Europacific Partners – Melbourne, Victoria, Australia

AI Adoption Specialist (Business Partner Technology – Intern) 2025

- Working on AI initiatives and AI trainings.
- Investigating the benefits of new AI tools adoption in various department workflows to improve the processes of the company and the revenue growth they may drive.

ASML – Eindhoven, Netherlands

Java Software Developer (Intern) 2024-2025

- Developing an open-source Java library for prioritization of requests from various applications part of the data and digital platform of ASML.
- Developing a translation layer for mapping the ASML-specific classified information, thorough testing and documentation are also part of the project.
- Solving the 'Noisy Neighbor' software problem - when one user in a shared system consumes excessive resources, negatively affecting the performance of others.
- Utilizing the SCRUM methodology.
- Software Architectural Design
- Test-Driven Development

Math Teacher – Remote

Freelance 2022-2024

- Working with kids in different age groups and different subject levels by helping them excel in their Mathematics knowledge.
- Preparing children for Math competitions, school final exams and university qualifications.

PUBLICATIONS

Barev, D. (2026).

A Reproducible OCR Benchmarking System for Scanned Car Repair Invoices

Technical article based on Bachelor's thesis conducted at Fraunhofer Institute for Industrial Engineering IAO.
