PROFESSIONAL SUMMARY

Software Engineering graduate with international experience developing enterprise software, cloud-native applications, backend systems, and intelligent automation solutions using Java, Python, and modern cloud technologies. Experienced in backend engineering, distributed systems, DevOps practices, and collaborating with technical and business stakeholders to deliver scalable software solutions. Passionate about AI, modern software architecture, and building reliable production systems.

TECHNICAL SKILLS

Programming: Java • Python • SQL • C#
Backend: Spring Boot • Backend Development • API Development • REST APIs • Microservices • Distributed Systems • Object-Oriented Programming • Cloud-Native Applications • .NET
Cloud & DevOps: Docker • Kubernetes • Azure • AWS • Git • Version Control • CI/CD • Deployment • Observability
Build Tools: Maven • Gradle
Databases: MySQL • MongoDB • PostgreSQL
Testing: Unit Testing • Integration Testing • Test-Driven Development • JUnit
Engineering: Code Reviews • Software Architecture • System Design • Root-Cause Analysis • Scalability • Resiliency • Agile (Scrum)

EDUCATION

Fontys University of Applied Sciences – Eindhoven, Netherlands

Bachelor of Science in Software Engineering 2022-2026
Relevant Coursework: Distributed Systems, Cloud Computing, Enterprise Architecture, Microservices, REST APIs, Docker, Kubernetes, Software Testing, System Design.
• University Ambassador Abroad

Victoria University – Melbourne, Australia

Exchange Semester in IT Management 2025
Relevant Coursework: Leadership, Personal and Professional Branding, Communication Development, Project Management

Sofia High School of Mathematics – Sofia, Bulgaria

Diploma in Mathematics and Information Technologies 2017-2022
Relevant Coursework: Mathematics, IT Systems, Programming
• High-School Representative and Speaker
• Captain of the Volleyball Team

EXPERIENCE

Fraunhofer Institute for Industrial Engineering IAO – Stuttgart, Germany

Scientific Assistant – Applied AI Research 2026
• Developed scalable Python applications for automated document processing.
• Designed modular processing pipelines integrating multiple software components.
• Processed and validated structured XML/JSON data for automated evaluation pipelines.
• Developed automated benchmarking, validation, and testing workflows.
• Collaborated with multidisciplinary software engineering teams in an Agile environment.

Coca-Cola Europacific Partners – Melbourne, Victoria, Australia

AI Adoption Specialist (Business Partner Technology) 2025
• Supported enterprise AI adoption initiatives across multiple business departments.
• Evaluating emerging AI technologies to improve business workflows and operational efficiency.
• Collaborated with technical and business stakeholders to support AI implementation and change adoption.

ASML – Eindhoven, Netherlands

Java Software Developer 2024-2025
• Developed enterprise Java applications supporting large-scale distributed engineering platforms.
• Designed reusable Java components following object-oriented design principles.
• Developed and maintained backend services and enterprise software components.
• Applied Test-Driven Development and unit testing to deliver reliable, maintainable software.
• Collaborated using Git workflows, peer code reviews, and continuous integration practices.

Math Teacher – Remote

Freelance

2022-2024

- Working with kids in different age groups and different subject levels by helping them excel in their Mathematics knowledge.
- Preparing children for Math competitions, school final exams and university qualifications.

PUBLICATIONS

Barev, D. (2026).

A Reproducible OCR Benchmarking System for Scanned Car Repair Invoices

Technical article based on Bachelor's thesis conducted at Fraunhofer Institute for Industrial Engineering IAO.

Medium: <https://medium.com/@mitkobarev/a-reproducible-ocr-benchmarking-system-for-scanned-car-repair-invoices-fff3f80c06f1>

CERTIFICATIONS & TRAINING

Fadata PL/SQL + AI Tech Academy — Certificate of Completion, 2026

- Oracle SQL, PL/SQL, relational database design, and applied AI.

LANGUAGES

- English – Full Professional | Bulgarian – Native | Dutch – Basic | Spanish – Basic | German – Basic

INTERESTS

- Endurance Sports, Public Speaking, Artificial Intelligence
